

Office of Materials and Research  
Qualified Products List

The following is a list of coarse aggregate sources established according to the specifications set forth in Standard Operating Procedure No. 1, "Monitoring the Quality of Coarse and Fine Aggregates." These sources have proven their capability of meeting the requirements of Section 800.2.01 of the Standard Specifications. All of these sources are approved to certify materials for use in Portland cement concrete and/or asphaltic concrete. Most of these sources also supply a full range of other products.

**QPL-2**

**Coarse Aggregate Sources  
Section A "Standard Sources List"**

**Pit and Quarry Control Branch**

15 Kennedy Drive  
Forest Park, GA 30297

Office Phone: 404-363-7630  
Office Fax: 404-363-7684

The sources listed have approved Quality Control Programs and materials they certify may be used prior to project control testing unless non-uniform or non-specification material is suspected. Section 106 of the Standard Specifications provides that the approval of preliminary samples does not obligate the engineer to accept materials from the same source delivered later.

For the purpose of this list, the descriptions listed under CHARACTER OF MATERIAL are very general.

<p>NOTE 1: Contains excessive sulfur computed as sulfide sulfur. Not to be used in bridge type structures.</p> <p>NOTE 2: Testing has shown this aggregate to be potentially alkali-silica reactive. Certain restrictions apply to its use in Portland cement concrete and these restrictions must be verified by the Office of Materials and Research prior to use.</p> <p>NOTE 3: Mechanically graded rip rap can be furnished from this source.</p> <p>NOTE 4: The restrictions applicable to the use of Group I aggregate in bituminous mixes do not apply to this Group I aggregate. All other Group I specifications are applicable.</p> <p>NOTE 5: Material at times may exceed abrasion loss limits of Class A. Verification of class will be made when Class A material is required.</p> <p>NOTE 6: Use of this material in applications other than asphaltic concrete must be approved by the Office of Materials and Research prior to use.</p> <p>NOTE 7: Use of this material for asphaltic concrete construction on Interstate Projects or for Portland Cement Concrete construction must be approved by the Office of Materials and Research.</p> <p>NOTE 8: Due to design or service record deficiencies, this source has been restricted from certain classes and types of Portland cement concrete. Verification of restrictions should be made through the Concrete Branch of the Office of Materials and Research prior to use.</p>												

Office of Materials and Research  
Qualified Products List

Following is the list of the coarse aggregate sources that are approved to supply aggregates for limited use only. This list was established according to the requirements set forth in Standard Operating Procedure No. 1, "Monitoring the Quality of Coarse and Fine Aggregates." These sources have proven their capability of meeting the requirements applicable to the products and uses that are listed below.	<div>QPL-2</div> <div>Coarse Aggregate Sources</div> <div>Section B "Temporary Sources List"</div>		<div>Pit and Quarry Control Branch</div> <div>15 Kennedy Drive</div> <div>Forest Park, GA 30297</div> <div>Office Phone: 404-363-7630</div> <div>Office Fax: 404-363-7684</div>		
These listed sources have approved Quality Control Programs that are applicable to the products listed. The listed products may be certified by the producer and may be used prior to project control tests unless non-uniform or non-specification material is suspected. Section 106 of the Standard Specifications provides that the approval of preliminary samples does not obligate the Engineer to accept materials from the same source delivered later.					
For the purpose of this list, the descriptions under "CHARACTER OF MATERIAL" are very general.

**Office of Materials and Research  
Qualified Products List**

Following is the list of coarse aggregate vendor sources established according to the requirements set forth in Standard Operating Procedure No. 1, "Monitoring the Quality of Coarse and Fine Aggregates." These sources vend materials that originate from approved sources or approved stockpiles.*	QPL-2  Coarse Aggregate Sources Section C "Vendor Sources List"		Pit and Quarry Control Branch 15 Kennedy Drive Forest Park, GA 30297  Office Phone: 404-363-7630 Office Fax: 404-363-7684		
These listed sources have approved Quality Control Programs and materials they certify may be used prior to project control tests unless non-uniform or non-specification material is suspected. Section 106 of the Standard Specifications provides that the approval of preliminary samples does not obligate the Engineer to accept materials from the same source delivered later.

<b>*MATERIALS ORIGINATING FROM A "STOCKPILE BASIS ONLY" SOURCE:</b> Project Control Acceptance Samples must be taken from materials delivered to the project or plant by departmental personnel and acceptability confirmed prior to use. The exception would be for base, backfill and stabilizer material. These materials may be placed but not covered up or otherwise rendered inaccessible for correction or removal prior to acceptability being confirmed. <b>THE SOURCE NUMBER FOR "STOCKPILE BASIS ONLY" SOURCES WILL END WITH AN "S."</b>					

**Office of Materials and Research  
Qualified Products List**

The following list of sources do not meet criteria for being placed on Qualified Products List 2, Section A or B as set forth in Standard Operating Procedure No. 1, "Monitoring the Quality of Coarse and Fine Aggregates." Therefore these sources may not certify quality of aggregates shipped. However, SOP I does provide acceptance procedures to utilize specification materials as they are available.	<div>QPL-2</div> <div>Coarse Aggregate Sources</div> <div>Section D "Stockpile Basis Only</div> <div>Sources List"</div>			<div>Pit and Quarry Control Branch</div> <div>15 Kennedy Drive</div> <div>Forest Park, GA 30297</div> <div>Office Phone: 404-363-7630</div> <div>Office Fax: 404-363-7684</div>
Availability of specification materials should be verified through the Office of Materials and Research. Materials will be approved for shipment on a stockpile basis only. In addition, acceptance samples must be taken from materials delivered to the project or plant by departmental personnel and acceptability confirmed prior to use. The exception would be base, backfill and stabilizer material. These materials may be placed but not covered up or otherwise rendered inaccessible for correction or removal prior to acceptability being confirmed.				
For the purpose of this list, the descriptions listed under CHARACTER OF MATERIAL are very general.
